

Giovanni Pareschi is a Senior Research Fellow and Director of Research at INAF. He holds a degree in Astronomy from the University of Bologna and a PhD in Physics from the University of Ferrara. After completing post-doctoral studies in Denmark, he joined the Brera Astronomical Observatory in Italy in 1998. Pareschi's primary area of expertise is developing technology and instrumentation for ground-based and space telescopes. He has collaborated with various national and international organizations such as ASI, ESA, ESO, NASA, JAXA, MPE, Harvard-Smithsonian CfA, and DESY. He has authored numerous instrumental and observational astronomy papers and holds several patents. Pareschi currently leads INAF's participation in the international Cherenkov Telescope Array Observatory (CTAO) project and is the principal investigator of the ASTRI mini-array experiment at the Teide Observatory (Canary Islands)
