CV APPLIED FOR

Concorso INAF 2020 – Dirigente MA3

WORK EXPERIENCE

ACTUAL WORKING POSITION

Senior researcher within National Institute for Astrophysics (INAF) - Italy

2012-Present

Hyperhemispheric and Bifocal Panoramic Lenses

In the recent years most of my work was focalised on design and development of a novel concept of hyper-hemispheric lenses [R28, C2, C3, P66, P67, P71]. A lens patent has been granted in Italy [B3]. This lens find space/planetary applications as multifunctional sensor for mini- and micro-satellites [R30, R31, P71], funded by H2020 SME Instrument scheme [B5], explore lunar caves (funded by ESA Expro+ measure, “Daedalus” project), stereoscopic autoguide for planetary rover [P72, P75]. A downgrade of the lens has been selected as optical head for the EnVisS instrument to be mounted onboard the ESA F-class mission Comet Interceptor [P73, P74].

In the meanwhile I work also in the design a space telescope for surveillance of geosynchronous space debris, in collaboration with Telespazio SpA [R32].

2003-2015

Radiotelescope Metrology

I was coordinator of the metrology group of the SRT (Sardinia Radio Telescope), a 64 meter active-optics radio antenna sited in the Sardinia Island (Italy). The main task of the metrology group is to build up an optical system for enabling the active surface *control loop* closure of the main dish [P43-P45, P47, P48, P51, P57, P59, P60, P64].

Optical Coherent Tomography (OCT)

With the aim of measuring the roughness of radio panels, in the framework of the SRT researches, I built a partially coherent light interferometer, able to measure 3D surface features with accuracy of 1 µm and a large depth of field: up to some mm [P58]. That interferometer has found application also in other research fields, such as metrology for mechanical clockwork [P54] and artwork diagnostic [P52, P55] and metrology [P70, P69].

Quantum Communications

In the meanwhile I collaborate, as optical designer, within an international group working in quantum communications and quantum astronomy. Published works are in the field of ground-space quantum communication [R19-R21, P46] and

quantum astronomy [R23-R26, P49, P53, P56]. I design and test a novel unobstructed optical terminal devoted to single-photon long-distance free-space quantum communication [P63]. The telescope is now in use inside the quantum communication group of the University of Wien.

- 2000-2015 Astronomic Polarimetry**
From the 2000 I was in charge at the Astronomical Observatory of Padova, mainly working on design and realization of a novel astronomical polarimeter [R29, R17, R18, P30, P32, P33, P36, P37]. I design a new instrument for the Cote d'Azur Observatory especially dedicated to asteroids astronomy [P65, P68]. Other fields of research were wavefront sensors [R14, P20], infrared optical design [P21, P22, P35], volume phase holographic gratings [P29, P31, P32] and fiber Bragg grating for astronomical applications [P35].
Co-Chairman of the "Polarimetry in Astronomy" conference, held in San Diego (CA) in the 2002 by the International Society for the Optical Engineering (SPIE).
- 1996-1999 Active Optics Optical Telescope**
After the Ph. D. studies I received a grant for working inside the Telescopio Nazionale Galileo (TNG), a 3.5 meter active-optics telescope then in the building phase at La Palma Island (Canary Islands, Spain). The main work regarded the alignment and commissioning of the telescope [R11, R13, R14, P12-P16, P23, P24]. In this period I was the responsible of the TNG Active Optics Group.
- 1992-1995 Ph. D. work: Extreme Ultraviolet Space Optics**
My main activity during the Ph. D. studies was the alignment and laboratory test of the "Ultraviolet Coronagraph Spectrometer" (UVCS) for the SOHO (Solar and Heliospheric Observatory) satellite [R2, P2].
The test on the UVCS-LEU (Laboratory Evaluation Model) was performed inside the Department of Electronic of the Padova University [R3, R4, P4, P6, P7], while the test on the UVCS-FM (Flight Model) was done in Alenia Spazio (Torino, Italy) and at the Harvard-Smithsonian Centre for Astrophysics (CfA - Cambridge-MA) [P5]. After the launch I follow the calibration phase of the instrument [R7, R9, P8, P9, P10] until the first scientific results [R5, R6, R8, R10, R12, P11].
For this work on the test and calibration of the SOHO-UVCS I receive two awards: one from NASA [A1] and one from ESA [A2].

EDUCATION AND TRAINING

- 1995** Ph. D. in "Space Science and Technologies", University of Padova
Thesis title: "Extreme Ultraviolet Space Optics Instrumentation"
- 1990** Laurea degree in Astronomy, University of Padova

ORGANISATIONAL COMPETENCIES

- 2006-2011** Member of the INAF-UIT (Technology Transfer Office, INAF)
2003-2010 Coordinator of the Metrology group of the Sardinia Radio Telescope (SRT)
2000-2002 Manager of the Asiago telescopes (Astronomical Observatory of Padova)
1996-1999 Coordinator of the TNG Active Optics Group (La Palma, Canary Island, Spain).

AWARDS

- 1995 Special Act group Award for contribution to the UVCS (NASA-GSFC)
1995 Award for contribution to the SOHO (ESA).

ADDITIONAL INFORMATIONS

Teaching Experiences Lessons for University courses

“Ottica per Infrarosso” - Master II level “on “Applied Optics” - Univ. of Padova – 2002/2005
“Tecnologie per l’astrofisica” – Physics laurea course - Univ. of Cagliari – 2004/2007
“Progettazione ottica” – Master II level “on “Applied Optics” - Univ. of Padova – 2005/2008
“Esperimentazioni di Fisica II” – Astronomy laurea course - Univ. of Padova – 2006/2008
“Panoramic Optics” – Ph.D. course on “space science and technologies”, Univ. of Padova, 2017
Optical interferometry - Ph.D. course on “space science and technologies”, Univ. of Padova, 2018
“Astronomical polarimetry” – NEON Summer school, Univ. of Padova, 2002

Lessons for enterprises courses:

“Optical design” – ART group SpA, Confindustria Umbria - 2009
“Optical design” – Officina Stellare SpA, EU Action Research - 2017
“Optical design” – Adaptica srl, EU Action Research - 2019

Publications See annex below

PADOVA, 29.09..2020

List of Publications of Claudio Pernechele

Total citations = **2526** (from research gate only)

h-index = **20** (from research gate).

Key legend: Cxx = Books / Book Chapters (invited).
Rxx = Peer refereed papers.
Pxx = Proceedings.
Bxx = Patents and copyright ownership.
Axx = Awards.

Books & Book Chapters

- C3:** C. Pernechele, "*Introduction to Panoramic Lenses*" (2018), SPIE Digital Library, Bellingham (Washington), <https://doi.org/10.1117/3.2322575>
- C2:** C. Pernechele, "*Bifocal Panoramic Lens*" (2015), chapter in the book *New Developments in Surveillance Systems and National Security*, edited by K. F. Hodges, Nova Science Publisher Ed., NY, USA. <https://novapublishers.com/shop/new-developments-in-surveillance-systems-and-national-security/>.
- C1:** C. Pernechele, "*Imaging: Adaptive Optics*" (2005), chapter in the *Encyclopedia of Modern Optics*, edited by R. D. Guenther, D. G. Steel and L. Bayvel, Elsevier, Oxford. <http://www.sciencedirect.com/science/article/pii/B0123693950007028>.
